Ideal Customer Profile (ICP)

Overview

The ideal customers for our product are educational institutions that manage complex academic schedules and require efficient systems for timetable planning and faculty coordination. These institutions often face challenges with manual scheduling and are looking for smart, automated solutions.

Demographic Profile

Our target customers include:

- Educational Institutions: Schools, Colleges, and Universities
- User Roles:
    - Administrative Staff
    - Timetable Coordinators
    - Faculty Members (Teachers/Professors)
- Institution Size: Medium to Large-scale institutions with multiple departments
- System Usage: Institutions already using basic or advanced digital systems

These customers typically operate in environments where managing schedules and faculty allocation is complex and time-sensitive.

Psychographic Profile

The behavior, needs, and mindset of our customers include:

- Prefer automation over manual work
- Frequently face timetable conflicts and scheduling issues
- Require quick solutions for teacher absence and substitutions
- Focus on efficient faculty/resource management
- Open to adopting smart and digital systems
- Value solutions that save time, reduce stress, and improve accuracy

Key Needs & Expectations

- Conflict-free automated timetable generation
- Instant and accurate faculty substitution
- Real-time visibility of schedules and availability
- Reduction in manual workload and errors
- Simple, reliable, and easy-to-use systems
