Customer Persona

Persona Overview

Our ideal customer is a working professional in medium to large-scale educational institutions responsible for managing academic operations such as timetable scheduling and faculty coordination.

Name: Mr. Ramesh Kumar
Age: 45 years
Education: M.Tech / MBA
Location: Urban / Semi-Urban
Income Level: ₹6–10 Lakhs and above

Professional & Work Profile

Mr. Ramesh Kumar works as an Administrator / HOD / Operations Manager, handling multiple departments, semesters, and faculty members. His role involves ensuring smooth academic scheduling, coordination, and daily operations within the institution.

Lifestyle & Technology Usage

He leads a busy, time-bound, and responsible lifestyle, managing multiple tasks under strict deadlines. He primarily uses laptop/desktop systems and is familiar with tools like Excel. Although he relies mostly on manual methods, he is open to adopting digital systems that are simple and efficient.

Needs & Expectations (Psychographic Profile)

- Automated timetable generation without conflicts
- Quick and accurate faculty substitution
- Real-time visibility of schedules and workload
- Reduction in manual effort and errors
- Simple, reliable, and time-saving solutions

Pain Points (Problems Faced)

- Timetable creation takes 2–3 days using manual methods
- Frequent scheduling conflicts (faculty, room, subject overlap)
- Difficulty in managing last-minute substitutions
- Lack of real-time data on faculty availability
- Errors and inefficiencies due to manual tracking

Value Proposition

- Reduces timetable creation from days to seconds
- Automatically assigns suitable substitute faculty
- Ensures zero conflicts and balanced workload
- Improves efficiency, accuracy, and continuity of classes .
